ABOUT US

Homesol Building Solutions delivers energy assessments, modelling, ratings, labels, and verified building energy solutions for residential new construction or retrofit projects for homeowners and home builders.

We firmly believe in the power of sustainable living and the positive impact it has on our planet. That's why we are tirelessly committed to promoting eco-conscious choices and implementing energy-efficient solutions in homes across the nation.

Homesol is authorised by Natural Resources Canada to conduct energy assessments as part of the Greener Homes Canada programme.

OUR STORY

Our journey began in 1999 when we laid our roots in the heart of Ottawa with a simple yet powerful vision –to revolutionize the way homes function by making them more energy-efficient and environmentally friendly. Over the years, our commitment to this mission has propelled us forward, enabling us to expand our reach and impact.

OUR VISION

Today, Homesol Building Solutions proudly serves six provinces, reaching communities far and wide with our expertise in energy assessments and sustainable home improvements. Our story is one of growth, innovation, and a deep-seated dedication to creating homes that are not just spaces to live in but also beacons of eco-conscious living.

OUR MISSION

As we continue to evolve and adapt to the ever-changing landscape of energy efficiency, our core values remain unwavering, driving us to make a meaningful difference in the lives of homeowners and in the preservation of our planet.

WHY CHOOSE US?

Our expertise encompasses a comprehensive range of services, including energy assessments, modelling, ratings, labels, and verified building energy solutions tailored for both residential new construction and retrofit projects.

But our commitment doesn't stop at assessments and advice. We go the extra mile by advocating for your energy needs, recommending necessary upgrades to Natural Resources Canada, and meticulously tracking your file until you secure the grant you deserve.

Receive up to \$10,000 in grants for retrofit upgrades to your home

Air Sealing - \$1,300*

Reduced air leaks reduces energy waste and increases building durability and comfort.

Insulation - \$10,000*

Improve the insulation in your exterior walls, ceiling, attic and foundation to reduce energy loss.

Windows & Doors - \$325*

Upgrade your dated windows and glass doors with ENERGY STAR and other certified models per rough opening (windows and doors).

Hot Water Tank - \$1,300*

Replace your domestic water heater with an ENERGY STAR certified domestic heat pump water heater.

Renewable Energy - \$5,000*

Install a solar PV system on your home to generate your own renewable energy.

8+ Other Upgrades - \$5,000*

There are more than 7 other upgrades for your home including resiliency measures ranging from \$50-\$5,000.

Heat Pumps - \$6,500*

Install an air-source heat pump to secure a more efficient and reliable source of air conditioning and heating.

Cost of Assessment - \$600*

Covered cost of assessment up to \$600 as a maximum contribution towards the total costs of your pre and post retrofit EnerGuide home evaluations.

*All values are shown as a maximum payout. The grants give a maximum of \$10,000, plus a contribution of up to \$600 towards the assessment cost of the Energy Assessment.
Example: If the homeowner gets \$10,000 for insulation but also install a heat pump, they will only get \$10,000.
